## Professional Summary

Full-Stack Developer specializing in **AI-powered applications, scalable cloud-native systems, and SaaS platforms**. Proven ability to deliver production-ready solutions using **React, Node.js, AWS, Docker, and Kubernetes**. Enhanced enterprise workflows by **18%**, accelerated support resolution by **45%**, and deployed systems handling **1000+** active users.

## Technical Skills

|              |                                                                |
|--------------|----------------------------------------------------------------|
| Languages    | Python, Java, C, HTML, CSS, JavaScript, TypeScript             |
| Frontend     | React, Tailwind CSS, WinUI                                     |
| Backend      | Node.js, Express, REST APIs, Spring Boot, Webhooks, Workers    |
| Cloud/DevOps | AWS (EC2, EKS, S3), Docker, Nginx, Linux, CI/CD, Kubernetes    |
| Databases    | MongoDB, PostgreSQL                                            |
| AI/ML Tools  | LLMs, LangChain, RAG, Generative AI, OpenAI APIs               |
| Concepts     | Data Structures & Algorithms, OOP, OS, DBMS, Agile Development |

## Work Experience

### Software Intern

*DP World, Chennai | Jun 2025 – Jul 2025*

- Streamlined workflows, boosting process efficiency by **18%** through real-time analysis.
- Deployed standardized Linux environments with **Docker** and **Nginx**, ensuring consistent releases.
- Automated server monitoring pipelines, saving **12+ hours of manual work per week**.

### Application Developer Intern

*Maestrominds | Jun 2025 – Jul 2025*

- Developed an **interactive 3D food preview system** using Three.js, reducing order errors by **15%**.
- Implemented ingredient-level customization, raising customer satisfaction by **20%**.
- Optimized 3D rendering for mid-range devices, increasing average FPS by **30%**.

## Projects

### AI-Driven Customer Service Platform

*Node.js, React, Python, AWS, Docker*

- Designed a multilingual chatbot, real-time transcription service, and automated ticket routing.
- Reduced customer support resolution time by **45%** with intelligent routing.
- Orchestrated containerized **microservices** on AWS with **99.9% uptime**.

### MERN Food Delivery Application

*MongoDB, Express, React, Node.js, JWT*

- Architected secure **multi-role access** (user, restaurant, admin) with JWT authentication.
- Built robust REST APIs with error handling, validation, and activity logging.
- Increased reliability by achieving **25% fewer support tickets**.

## Education

### B.Tech, Artificial Intelligence & Data Science

*Sri Sairam Engineering College, Chennai | Expected May 2026 | CGPA: 8.31*

## Coursework

Data Structures and Algorithms, Operating Systems, Database Management Systems, Big Data Analytics, Machine Learning, Cloud Computing

## Certifications

- Python for Data Science** – NPTEL, 2024
- Full-Stack Development** – Udemy, 2024
- Full Stack - Industry 4.0** – NXTWAVE, 2025 (In Progress)

## Achievements

- 3rd Prize** – Appian AI Challenge (IIT Madras).
- Solved **350+ problems on LeetCode**, ranked in the Top **26.5%** globally.
- Conducted a **web development workshop** for 150+ students at IEEE, rated **4.8/5**.
- Winner of **5+ national-level hackathons & symposiums**.
